

INNOVATIVE & POWERFUL TECHNOLOGY

VERSATILITY

LOW-ENERGY

FAST DEPLOYMENT

WHY REC[4]BOX?

Within the last three years, Rec[4]Box has developed a modern outdoor mobile broadcasting unit that exceeds the highly creative demands of production teams, while managing the realities of tighter budgets and production timelines. Rec[4]Box OB trailers were designed in collaboration with various directors, producers and technicians: to offer a transformative working environment with modular and adaptable details; workstation ergonomics and trendy interior design that promote outstanding comfort; and finally, lighting-fast transportability facilitating ease-of-setup.

OUR FACTORY IS YOUR FACTORY:

Upon request, these trailers are *fully* customizable from the inside-out, to accommodate varying production requirements. In just 12 weeks, we deliver a fully operational and personalized OB trailer. Directors and producers alike, will achieve superior quality output - and shape the future towards setting new industry standards in cost-performance ratio.

FUNDAMENTAL OBJECTIVES:

Innovative and powerful technology:

Delivering the newest innovations in broadcast technology and offering outstanding performance and efficient production capabilities.

Versatility:

Modify or add equipment with ease thanks to the trailers adaptable and modular design.

Low-Energy:

*Utilizing a low energy system, power up the entire trailer with a **standard** 40A/240v supply.*

Fast Deployment:

Convenient deployment takes less than one hour with only two technicians.

TECH SPECS:

ULTRA LIGHT MONOCOQUE TRAILER DESIGN

Full aluminum structure, rust-free, solid engineering and industrial-quality paint. Unique levelling and stabilizing system. Custom interior with engineering control room, storage space and production gallery. Rugged & road tested.

ROSS CARBONITE SWITCHER

2 ME and 4 MINI ME technology. 24 input full-frame sync. Award-winning, full HD, high-performance platform.

COMPLETE MONITOR WALLS

Multiple router feeds w/ergonomic production gallery design.

RIEDEL ARTIST 64 COMMUNICATION SYSTEM

A fully digital, non-blocking, true-network matrix intercom, with a distributed architecture. Flexible. Expandable.

FIBER OPTIC SYSTEM

Long-range compatibilities. High-density and low weight.

RECORDING SYSTEMS

10 AJA KIPRO rack for ISO and PGM recording. High-end video server for playback. 10 hrs, full resolution rec. time.

AUDIO ROOM

Studer Vista 1 digital console, w/22 fader 96 DSP channels. 64 inputs over Riedel stagebox kit, full 5.1 surround monitoring system. GPIOs. Mix-Minus. Expandable.
